About...

Dr. Glenn Singleman & Heather Swan

Dr. Glenn Singleman and Heather Swan are a husband and wife team who jointly hold the Guinness World Record for the highest BASEjump (exit altitude) and the highest wingsuit BASEjump. Glenn and Heather are Australia's most recognised wingsuit pilots and recipients of the Australian Geographic 'Spirit of Adventure Award'.

Set on May 23rd 2006 from a 6672 metre Himalayan mountain, their amazing wingsuit record was the result of six years unrelenting hard work and an unshakeable commitment to their goal.

More recently Glenn and Heather's 'Furthest Flight' project featured on 60 Minutes in Australia and New Zealand. The project set three records - an Australian Ballooning altitude record, an Australian Skydiving exit record and a world wingsuit exit record. Furthest Flight 2011 is scheduled for June/July 2011.

Glenn is also practicing medical doctor and award winning documentary film-maker. He has traveled all around the world on ground breaking

expeditions to make award winning films. He has man-hauled sleds across Antarctica to climb a virgin peak, he was part of the team to set a world record for the highest Black Tie Dinner Party, he was the Doctor and Cameraman on the Ballooning over Everest expedition, the leader of the BASEClimb expeditions, the doctor and a camera operator on James Cameron's 'Live from the Titanic' project, and the leader of the 'Furthest Flight' project, to mention a few.

Heather is an award winning author and photographer. Her current book is 'No Ceiling', published by Five Mile Press.

Glenn and Heather have made countless media appearances and continue to be sort after professional speakers both in Australia and internationally. Their ideas on overcoming fear and peak mental and physical fitness resonate strongly with everyone interested in optimising performance, health and happiness.
